

INFOTRADE MARKET INSIGHTS

This week's issue will focus mainly on Milk. Reports indicate that the price of Milk has generally increased as compared to previous weeks. Prices of Milk were seen to have increased across all markets in the country from the previous week across. Previously the average wholesale price has been ranging from SHS 1000 to SHS 1200 and average retail price has been ranging from SHS 1400 to SHS 1500. This price increment is attributed to the weather changes hence affecting the production and supply of milk countrywide.
